(For Address Only.)

The Rijks Museum is an imposing brick and stone building in the Dutch Renaissance style, which was erected in 1877-85 from designs by P. J. H. Cuypers, the principal façade of which faces the Stadhouders-Kade. Its interior contains much to interest the tourist, including a military, naval and colonial section, ecclesiastical section, civil and domestic industrial art section, and a magnificent collection of antiques and pictures.
